

LOCKABLE LINE VALVE

The MIPS range of Lockable Line Valves is designed for economy, maximum design life and reliability, whilst requiring minimum maintenance.

The range of valves offers the following design features:

Features and Benefits

- ✓ Comply fully with the requirements of HTM 02-01
- ✓ Flat faced 'o' ring pipeline unions
- ✓ Lockable in both open and closed positions
- ✓ Standard range from 15 – 108 mm
- ✓ Completely tamper proof locking device
- ✓ Every valve pressure tested prior to despatch
- ✓ Every valve tested for tightness (no pressure pass when closed)

In addition to all of the above, MIPS can CUSTOM BUILD Valve manifolds to your specific requirements.

- Here are some examples:
- ✓ N.I.S.T. connector line valves
 - ✓ Multi-valve manifolds, complete with fixing frame
 - ✓ Padlocks available
