Medical & Industrial Pipeline Systems Limited was created to provide solutions for a world under pressure.

With more than 40 years experience, we have become the leading specialist in Ireland for the design, manufacture, installation, commissioning and maintenance of piped gas equipment for the **medical, industrial, laboratory, computer, pharmaceutical, educational and electronic industries.**

We are a member of BCGA (British Compressed Gas Association). Our installed medical gas distribution systems comply with the HTM 02-01 Section 2.28 codes. Our company processes are controlled and audited to ISO 9001:2015.

From a single science laboratory bench to a full-scale design & build hospital medical project, the MIPS team are committed to always giving a highly professional service.

Combined, our management team has over 100 years of service in the industry. We use this experience every day to design new systems and help solve our customers' technical problems.

We have the largest team of permanent specialist fitters employed by any independent pressure gas installation company, in the country. All our senior operatives are qualified Medical Gas Competent installers, who operate in line with our fully audited Quality Management System to ISO 9001: 2015. We invest in the continuous training and upskilling of our staff, including Authorised Person (AP) and Competent Person (CP) MGPS certification.

Purpose-Built Facility

Our factory in Dunshaughlin, Co. Meath is fully equipped to allow us to assemble, test and certify the wide range of products we supply to our customers.

We stock over 5,000 spare parts so our customers can have confidence that our installation and maintenance services are not reliant on components having to be sourced from overseas leading to unacceptable delays; a true 24/7 service.

Our clients are welcome to visit our offices and factory - contact us to schedule a visit

Medical, Industrial and Laboratory Gas Installations

We can provide customer-specific medical products and installations, from plant to pendants and everything in between.

We can offer our in-depth knowledge of the issues and requirements facing your sector, be it medical, industrial, laboratory, pharmaceutical, electronic or educational. From manifolds to termination points and all associated pipework and safety systems.

We specialise in the repair and modification of existing installations and connecting them to new systems. We have many years of experience in linking new and old alarm systems.

MIPS are happy to advise on which system or product best suits your needs and discuss our full range of products, services and prices. We will guide you through every stage of the process, and help develop the right solution for your organisation.

On completion of our work, we will pressure test and certify the completed installation. We produce customer-specific operational and maintenance manuals and can demonstrate the safe and correct operation of the new system and equipment to your staff.

Free Medical, Industrial & Laboratory Gas System Audits*

Our trained staff can inspect your existing systems for free. (*Subject to terms and conditions). On completion, we will provide you with an audit report, highlighting any issues and classifying them under high, medium, or low risk.

If you would like MIPS to visit your facility or site for a thorough audit, contact us to schedule an appointment.

Maintenance & Inspections

On-going maintenance and inspection of your plant, equipment and pipelines is vital to ensure their safe and efficient operation, and maximise their life expectancy.

Fully documented maintenance of your piped gas system may be required by your building insurer.

MIPS have been servicing and maintaining client equipment and installations nationwide for over 40 years.

Advantages of a MIPS maintenance contract are;

- Planned maintenance is cheaper and safer than the cost of emergency call outs.
- Reduce your insurance risk
- Rapid response time
- Out-of-hours service
- Spare parts availability
- 24 hours a day, 7 days a week technical phone support
- All documentation is traceable through ISO 9001:2015.
- View, save and print your completed maintenance visit checks and certificates through our online system.

Please contact us if you would like to receive a maintenance proposal tailored to your requirements.
